

1. **No dogs or pets allowed**
2. **Non-smoking premises; strict ban on fireworks – Protected Landscape Area**
3. **Heating in the house during heating season (30.9-30.4.) - the house is automatically heated to a fixed temperature of 21 °C.** (cannot be adjusted on-site; only remotely upon request by phone). If you light the fireplace and the room **temperature exceeds 21 °C**, the house's automatic **heating will turn off on its own**. As soon as the temperature drops **below 21 °C** again, **the system will automatically turn back on and begin heating** the house. Therefore, **there is no need to adjust or turn anything on manually—the system operates completely automatically.**
4. **Grilling – the grill area is located only by the fire pit – on the property behind the fence**
5. **Catler coffee maker – use only bottled water !!**
6. **Dishwasher – it has a dial that is manually turned to the right**
 - 1) = rinse
 - 2) = wash
 - 3) = dry

The on/start button is to the right of the handle. Once the **dishwasher is turned on, don't turn the dial until the program stops on its own**. There is a risk of stripping the threads, which would render the dishwasher inoperable.
!!FOOD SCRAPS BELONG IN THE TRASH, NOT IN THE DISHWASHER!
7. **Grease and oil from the kitchen – please pour all used grease into the compost, trash can, or a container designated for oil – NOT IN THE SINK!**
8. **Keys – please return the keys to the security box on the gate**
9. **POOL** (summer season is July, August): during your stay, check the water quality and remove any debris from the water's surface. When using the pool, please turn off the filtration system to prevent it from becoming airlocked. **After using the pool, turn the filtration system back on** for at least 2 hours. No jumping into the pool!
10. **Wood in the woodshed**– is intended for heating the fireplace – not for the fire pit
11. Changing shoes - change **your shoes at the house**, especially **on the first floor**, where there are noise-reducing rugs on the stairs. Ground floor – not necessary in the summer unless there's mud, etc.
12. **The property owner reserves the right to perform maintenance on the lawns and pool at any time, including during guests' stays. Guests will be notified of this in advance.**
